

STEWARDSHIP

Treasurer's Manual

Getting started · Start of year · Day-to-day · Month-end · Year-end

A calendar-ordered guide for Local Spiritual Assembly treasurers: from the first download to the audit and back around to the next fiscal year, with a printable checklist at the end of every part.

For Local Spiritual Assembly treasurers · Generated September 2, 2026

Contents

Welcome

How this manual is organized
The treasurer's year at a glance

Five ideas that make everything else simple
Quick-reference card

Part 1 · Getting started

1. Install Stewardship
2. First launch: choose where your data lives
3. The setup wizard
4. Complete your profile in Settings
5. Review the chart of accounts and enter budgets

6. Bring in your community
7. Record your first contribution
8. Adopting mid-year, or taking over from spreadsheets
Onboarding checklist

Part 2 · The start of the fiscal year

1. Confirm you are in the new year's file
2. Verify what carried forward
3. Enter the approved budget
4. Update the community counts

5. Confirm the treasurer's details
6. Run the first OCS import of the year
7. Make a backup
Start-of-year checklist

Part 3 · Day-to-day operations

1. Recording a contribution
2. Receipts
3. Recording an expense
4. Transfers between accounts
5. Importing OCS activity

6. In-kind contributions (contributed expenses)
7. Fixing mistakes
8. Donors
9. The Activity Log
Day-to-day cheat sheet

Part 4 · Month-end: reconcile, report, close

The month-end routine
1. Reconciling the bank statement
2. Reviewing the Monthly Report

3. Presenting at Feast
4. Closing the month
Month-end checklist

Part 5 · Year-end: annual reports, the audit, and the new year

The year-end timeline
1. Finish the books
2. The annual statements
3. The annual report to the LSA
4. Preparing for the audit

5. The NSA Treasurer's Financial Report
6. Start the new fiscal year
7. Archive the year
Year-end checklist

Welcome

Stewardship is a free desktop application that keeps the books for one Local Spiritual Assembly. It records contributions and expenses across your funds, issues numbered receipts, reconciles your bank statement, prints the Monthly Report you share at Feast, and at year-end produces the NSA Treasurer's Financial Report and assembles the complete package your auditors need. It runs entirely on your own computer. There is no cloud, no account, and no subscription, and your Assembly's records never leave your machine.

This manual is written for the treasurer, not the programmer. It assumes you know what the Local Fund is and that the Bahá'í year has nineteen months, and it assumes nothing about the app. If you can follow a recipe, you can run your Assembly's treasury with Stewardship.

How this manual is organized

The treasurer's job follows a calendar, so the manual does too. Five parts take you from the first download to the audit and back around to the next fiscal year.

Part	When you need it	What it covers
Part 1 · Getting started	Once, when you adopt the app	Install, create your Assembly's data file, set up accounts, funds, budgets, and donors. About one hour.
Part 2 · The start of the fiscal year	Every May 1	The short checklist that opens a new year: budgets, opening balances, community counts, first imports.
Part 3 · Day-to-day operations	Whenever money moves	Contributions, receipts, expenses, transfers, OCS imports, in-kind gifts, corrections.
Part 4 · Month-end	Once a month	Reconcile the bank statement, review the Monthly Report, present it at Feast, close the month.
Part 5 · Year-end	May through July	Final reconciliation, annual statements, the audit package, the NSA report, and rolling into the new year.
Reference	When something looks wrong	Settings tour, backups, updates, troubleshooting, glossary.

Read Part 1 the day you install. After that, keep the manual nearby and open the part that matches the task in front of you. Each part ends with a checklist you can print and tick off.

Where to start

If you are...	Start at
A new treasurer installing Stewardship for the first time	Part 1, then Part 3
Taking over mid-year from a treasurer who used spreadsheets	Part 1, section <i>Adopting mid-year</i>
A returning user opening a new fiscal year	Part 2
Getting ready for Feast	Part 4
Getting ready for the audit	Part 5
Staring at a screen that seems to have lost your data	Reference, <i>Troubleshooting</i> (spoiler: the wrong year's file is open)

The treasurer's year at a glance

When	What happens	Where in this manual
May 1	Fiscal year begins. Open the new data file, enter the approved budget, confirm opening balances.	Part 2
Every month	Record activity as it happens. When the bank statement arrives: import OCS, reconcile, review the Monthly Report, present at Feast, close the Bahá'í month.	Parts 3 and 4
April 30	Fiscal year ends. Post the last entries.	Part 5
Early May	Final bank reconciliation, close all nineteen months, back up the file.	Part 5
May	Produce the Statement of Activities, Balance Sheet, and Budget vs. Actual. Report to the LSA. Start the new fiscal year file.	Parts 5 and 2
May – June	The LSA appoints two auditors. Hand them the audit bundle. Track findings.	Part 5
By July 31	Submit the NSA Treasurer's Financial Report.	Part 5

Five ideas that make everything else simple

You do not need to understand accounting to use Stewardship, but five ideas come up on every screen. Two minutes here saves an hour later.

1. Funds say what money is *for*. Cash accounts say where money *is*. A **cash account** is a real place money sits: your bank checking account, the NSA's OCS holding account, the envelope of undeposited cash. A **fund** is a label for purpose: Local Fund, National Bahá'í Fund, Feast and Holy Days. One bank account holds money belonging to many funds. Every report you produce is built from these two views of the same dollars.

2. Every transaction is split across funds, and the split must add up. When you record a deposit or an expense, you say which fund or funds it belongs to. These **allocations** must sum exactly to the transaction amount. The form shows a running *Remaining* counter and will not save until it reads \$0.00. Transfers between cash accounts have no allocations because no fund changes.

3. Receipts issue themselves. Choose a donor when you record a deposit and Stewardship issues the next sequential receipt number automatically, with the NSA's required disclaimer text. You never type a receipt number. Contributions imported from OCS get no receipt because the NSA already sent one.

4. The year has nineteen months, and you close them one at a time. The fiscal year runs May 1 to April 30 and is divided into the nineteen Bahá'í months. Each month is a **period**. After you have reconciled and reported a month, you close it, which locks its transactions and records the community membership count used for participation percentages. Closing is reversible.

5. Each fiscal year is one file. Stewardship keeps each fiscal year in its own data file, normally in a folder like Documents/Bahai/182 – 183 BE/. Starting a new year creates a new file and carries your setup forward. Prior years stay exactly as they were, ready for an auditor's question. Backups are just copies of one file.

Watch out. Because each year is a separate file, the single most common “my data is gone” moment is simply having last year's file open. Check **Settings** → **Data file** before you worry.

Quick-reference card

The eight things you will do most. Click paths use the left sidebar.

Task	Click path
Record a contribution	Transactions → New transaction → type Deposit → amount, cash account, donor → allocate to funds → Save transaction
Find or print a receipt	Receipts → click the row → Download PDF
Record an expense	Transactions → New transaction → type Withdrawal → amount, cash account, check number in <i>Reference #</i> → allocate → Save transaction
Import OCS activity	Download the <i>Holding Account Daily Activities</i> .xls from the OCS portal → Transactions → Import OCS → pick the file → Import N entries
Reconcile a bank statement	Reconciliation → New reconciliation → account, statement date, ending balance → Start reconciling → tick cleared items until variance is \$0.00 → Mark complete
Print the Feast report	Monthly Reports → pick the Bahá'í month → Download PDF
Close a month	Monthly Reports → pick the month → Close period → confirm membership counts → Confirm close
Prepare for the audit	Audit → pick the fiscal year → fill Audit answers → Download bundle (.zip)

Keep this page. It is most of the job.

Part 1 • Getting started

This part takes you from nothing installed to a working set of books, ready for your first contribution. Budget about an hour. You will need:

- Your Assembly’s formal name, and its NSA locality code if you know it.
- The bank balance of each account on May 1 of the current fiscal year (from the bank statement, or from the prior treasurer’s final reconciliation).
- A list of any checks written before May 1 that had not yet cleared the bank, and any deposits made before May 1 that had not yet appeared on the statement.
- The LSA’s approved budget for the year, if it has one.
- Optionally, a CSV export of your community list from the NSA’s eMembership portal.

If you are taking over mid-year, or moving from spreadsheets, read everything here and then the section *Adopting mid-year* near the end.

1. Install Stewardship

Download the installer for your computer from the public releases page:

<https://github.com/bpamiri/stewardship-releases/releases/latest>

macOS (Apple Silicon and Intel). Download the `.dmg`, open it, and drag **Stewardship** into your Applications folder. The app is signed with an Apple Developer ID and notarized, so it opens without warnings. If macOS is ever cautious on the very first launch, right-click the app and choose **Open** once.

Windows. Download the `...-setup.exe` file and run it. The Windows build is not yet code-signed, so the first time you run the installer Microsoft Defender SmartScreen may show a blue “**Windows protected your PC**” dialog. Click **More info**, then **Run anyway**. This happens only at install time. Updates are verified by the app itself before they are applied. No administrator password is needed.

Linux. Choose the `.AppImage`, `.deb`, or `.rpm` that matches your distribution.

Stewardship checks for a new version every time it launches and offers to install it. It never updates silently or restarts while you are working. See the Reference for details.

2. First launch: choose where your data lives

The first time you open Stewardship it shows the **Data Location** page before anything else. It is asking one question: where should this Assembly's data file live?

The screenshot shows the 'Welcome to Stewardship' window. At the top is a purple icon of a building with columns. Below it, the title 'Welcome to Stewardship' is centered. A paragraph explains that Stewardship keeps records in a single file and asks the user to pick a spot. There are three main options, each in a white box with a light blue border:

- Choose folder... (RECOMMENDED)**: Includes a folder icon, a green 'RECOMMENDED' badge, and text explaining that it creates a `stewardship.db` file in the chosen folder. A purple button labeled 'Pick a folder...' is at the bottom right.
- Default location**: Includes a folder icon and text stating it's the standard app-data folder. A light blue button labeled 'Use default location' is at the bottom right.
- Open existing data file**: Includes a folder icon and text asking if the user has a backup. A light blue button labeled 'Open existing file...' is at the bottom right.

At the bottom of the window, a small note states: 'You can switch between data files later from Settings → Data file. Each file is a fully self-contained Assembly — nothing spills across them.'

On first launch, Stewardship asks where to keep your Assembly's data file.

You have three choices, shown in this order:

1. **Choose folder...** (marked *Recommended*). Click **Pick a folder...** and choose any folder. Stewardship creates a file named `stewardship.db` inside it.
2. **Default location.** Click **Use default location** for a system-managed folder inside the app's own data directory. Fine if you do not care where the file lives.

3. **Open existing data file.** Click **Open existing file...** to point the app at a `stewardship.db` you already have, for example from a backup or a previous treasurer.

The recommended folder layout

Create one folder per Bahá'í fiscal year and keep them together:

```
Documents/  
  Bahai/  
    182 – 183 BE/  
      stewardship.db  
    183 – 184 BE/  
      stewardship.db
```

Choose **Pick a folder...**, create the folder for the current year, and select it. Each spring, the New Fiscal Year screen asks you to pick the next year's folder the same way.

Why this matters. One file per year means a prior year can never be disturbed by current work, an auditor can be handed exactly one file, and a backup is a single copy. It also means the app opens one year at a time, which is the first thing to remember when something looks missing.

After you confirm a location, the setup wizard opens.

3. The setup wizard

The **Welcome to Stewardship** page collects everything the app needs to create your chart of accounts, your three default cash accounts, and the nineteen Bahá'í periods for the year. It is one form in four sections. Everything you enter here can be changed later in **Settings**.

Welcome to Stewardship

Tell us about your Local Spiritual Assembly. We'll create the chart of accounts, three default cash accounts, and the 19 Bahá'í periods for fiscal year 2026-2027.

1 Assembly

Identifying information for the LSA — used on receipts and the annual NSA report.

Assembly name *

Spiritual Assembly of the Bahá'ís of San Juan Capistrano

Locality code

e.g., 182 or 183 — the community's identifier

State

CA

Two-letter abbreviation

2 Treasurer

Appears on receipts and the NSA report's signer block.

Treasurer's name *

Mailing address

P.O. Box 1234, San Juan Capistrano, CA 92675

3 Fiscal year 2026-2027

Bahá'í accounting fiscal year runs May 1 – April 30. We'll create the 19 Bahá'í periods automatically. You can adjust period dates and opening balances later.

Fiscal year starting year *

2026

Runs May 1, 2026 – Apr 30, 2027

Bank opening balance

\$ 0.00

On May 1 of the fiscal year

OCS Holding opening balance

\$ 0.00

Petty / Undeposited opening

\$ 0.00

4 Outstanding items at year start (optional)

If you took over from a prior treasurer and last year ended with uncleared checks or deposits-in-transit, list them here. They won't appear in this year's activity — they only exist so you can clear them in your first bank reconciliation. Leave blank if last year closed with no outstanding items.

Add outstanding items

You can edit any of this later from Settings.

Create Assembly

The setup wizard collects your Assembly identity, fiscal year, and opening balances.

Section 1 · Assembly

- **Assembly name** (required). The full formal name, for example `Spiritual Assembly of the Bahá'ís of Anytown`. It appears on receipts, the Monthly Report, and the NSA report.
- **Locality code** (optional). The NSA-assigned community identifier. Leave blank if you do not know it.
- **State** (optional). Two-letter abbreviation.

Section 2 · Treasurer

- **Treasurer's name** (required). As it should appear on receipts.
- **Mailing address** (optional). The Assembly's mailing address, for example `P.O. Box 1234, Anytown, CA 92675`.

Section 3 · Fiscal year

- **Fiscal year starting year** (required). The calendar year in which May 1 falls. For the year running May 2025 to April 2026, enter `2025`. The heading updates live to show the Bahá'í year label, for example “Fiscal year 182–183 BE”.
- **Bank opening balance, OCS Holding opening balance, Petty / Undeposited opening**. The balance of each account on May 1. Enter plain numbers like `1234.56`. Leave blank or enter `0.00` for accounts with nothing in them.

Tip. For a brand-new Assembly with no history, leave all three balances blank. If your Assembly has been operating and you are adopting mid-year, enter the real May 1 balances even if it is now September. See *Adopting mid-year* below.

Section 4 · Outstanding items at year start (optional)

Collapsed by default. Click **Add outstanding items** only if checks written before May 1 had not yet cleared, or deposits made before May 1 had not yet appeared on the bank statement. For each account, click **+ Add item** and enter:

- **Direction:** *Outstanding check* or *Deposit in transit*.
- **Description**, for example `Check #1042 to City Hall`.
- **Amount**.
- **Ref #** and **Original date** (optional).

These items are not current-year income or expense. They exist only so your first bank reconciliation can tick them off when they finally clear.

Finish

Click **Create Assembly**. Stewardship builds the chart of accounts, the cash accounts, and the nineteen periods, and opens the **Dashboard**.

Cash accounts

Bank, OCS Holding, and Petty are seeded by default. Add others — savings, money market, secondary checking — as needed. Opening balances feed the live cash on hand calculation.

+ New cash account

NAME	TYPE	OPENING	AS OF	STATUS	Opening items
Bank Checking	Bank	\$12,500.00	May 1, 2025	ACTIVE	
OCS Holding	Ocs Holding	\$0.00	May 1, 2025	ACTIVE	
Petty Cash / Undeposited	Petty	\$150.00	May 1, 2025	ACTIVE	
In-Kind Clearing	In-Kind Clearing	\$0.00	May 1, 2025	ACTIVE	

Data file

Switch between Assemblies and fiscal years. Each entry is a fully self-contained SQLite database — switching restarts the app so the new data loads cleanly.

CURRENTLY WORKING WITH

182 - 183 BE ACTIVE

/Users/treasurer/Documents/Bahai/182 - 183 BE/stewardship.db
Last opened just now

Add another data file...

Data maintenance
One-off fixups for data files that pre-date a feature. Each action is idempotent — running it twice does nothing the second time.

Backfill donor counts
Walk every non-voided deposit. Where the description says "N donors" we copy that number into donor_count; deposits with a receipt linked to a named donor or "Anonymous" default to 1. Required once after upgrading to a build that introduced the donor_count column — otherwise the Monthly Report's % contribution stays at 0%.

Backfill donor counts

Backup & restore
A backup is a self-contained SQLite file produced via `VACUUM INTO` — restore it on this machine or any other to recover the full state. We recommend backing up after any significant batch of edits.

Back up database Restore from backup

Daily auto-backup: no snapshots yet — one is written on each app launch into a `stewardship-backups` folder next to your data file.

Updates
Current version: —

Check for updates

182 - 183 BE
Stewardship v1.4.0

Settings: Assembly profile, signature, community counts, fiscal years, cash accounts, data file, maintenance, backups, and updates.

Assembly profile. Confirm the name, locality code, state, treasurer, and address. Click **Edit** to change anything.

Treasurer signature. Optional but worth two minutes. Upload a scanned PNG or JPG of your signature (under 256 KB) and it is embedded above the signature line on every receipt PDF. Without one, receipts show your typed name.

Community. Enter the Bahá'í population of your community by NSA category: Adults (21+), Youth (15–20), Pre-Youth (11–14), Children (0–10). The total drives the participation percentage on the Monthly Report, and the four counts pre-fill the NSA Treasurer's Financial Report. The community list you import from eMembership (step 6) is the easiest place to count them.

Fiscal years. Shows the current year and its treasurer contact details. Click **Set treasurer** and add your address and phone numbers. They are used in the signer block of the NSA report.

Cash accounts. The wizard seeded three visible accounts:

Account	Type	Use it for
Bank Checking	bank	Your primary checking account
OCS Holding	ocs_holding	Online contributions held by the NSA before transfer to your bank
Petty Cash / Undeposited	petty	Cash collected at Feast and not yet deposited, or a petty-cash float

A fourth account, **In-Kind Clearing**, is created automatically. It appears in this Settings list but never in transaction forms or cash totals. It exists so in-kind gifts can be recorded with zero cash effect. Leave it alone.

- To fix an opening balance, click the pencil on the account's row, correct the **Opening balance** and **Opening balance date** (normally May 1), and click **Save**.
- To add a savings account, click **New cash account**, give it a name, choose type **Savings**, enter its May 1 balance and date, and optionally the last four digits of the account number. Only the last four digits are ever stored.
- To add prior-year outstanding items you skipped in the wizard, click **Opening items** on the account's row and add them there. This is only possible until the account's first reconciliation is completed.

5. Review the chart of accounts and enter budgets

Open **Funds & Budgets** in the sidebar. Stewardship ships with a default chart of twenty-three funds in four sections, matching the lines of the NSA Treasurer's Financial Report.

182 - 183 BE
Stewardship v1.4.0

The Funds page lists every fund with its budget and year-to-date actual, grouped by category.

Section	Funds
Income / Contributions	Local Fund · Center Fund · Earmarked Contributions (restricted) · Other Income · Contributed Expenses
Transmittals (sent up)	Bahá'í International Fund · World Center Endowment Fund · Continental Bahá'í Fund · National Bahá'í Fund · Shrine of 'Abdu'l-Bahá Fund · International Temples Fund · Regional Bahá'í Council · Bahá'í Development Fund · Bahá'í Chair for World Peace
Local expenses	Teaching / Proclamation · Feast / Holy Days · Children / Youth Programs · Education / Institute Training / Deepening · Scholarships / Deputization · Property Expenses · Bahá'í Center Operations · Other Expenses
Administrative	Administrative Expenses

Tidy the list

- **Archive funds you will not use.** No Bahá'í Center? Click the archive icon on *Bahá'í Center Operations*. Archived funds disappear from entry forms and reports but can be restored any time by ticking **Show archived** and clicking the restore icon.
- **Add a fund the chart lacks.** Click **New fund**, enter a name and short code, choose the category, and click **Create fund**. Tick **Restricted fund** only if every contribution to it must be earmarked for a stated purpose.

Enter the budget

Budgets are annual figures and default to \$0. If your LSA has approved a budget, enter it now; if not, come back when it does. Budgets drive the variance columns on the Monthly Report and the year-end Budget vs. Actual, so a fund without a budget simply shows a dash in those columns.

Subtotal			\$3,000.00	\$0.00		

Click the pencil on any fund row to edit its annual budget inline.

1. Find the fund in its section and click the **pencil** on its row.
2. Type the annual amount in the **Target** column (income funds) or **Budget** column (expense funds).
3. Press **Enter** to save, **Escape** to cancel.

The three tiles at the top summarize **Received to date**, **Spent to date**, and **Remaining budget**. The **Download PDF** button produces a printable Budget vs. Actual statement for the year to date, useful for LSA meetings.

Why this matters. The Monthly Report prorates each annual budget across the nineteen months (annual ÷ 19 per month, × months elapsed for year-to-date). Enter annual figures, not monthly ones.

6. Bring in your community

Donor records are what make receipts possible. You can add donors one at a time, or import your whole community in a minute.

Import from eMembership (recommended)

1. In the NSA's eMembership portal, run a Person Search for your community (the unfiltered list is fine) and download it as CSV.
2. In Stewardship, open **Donors** and click **Import community list**.
3. Click **Pick a .csv file** and choose the download. The app shows the list title, export date, and a breakdown of new records, updates, unchanged, deceased, and archived.

4. In **Options**, decide whether existing donors should be updated when names or contact details differ. Leave it on for a first import.
5. Review the **Staged records** table, untick anyone you do not want, and click **Import N records**.

Records are matched by Bahá'í ID number, so you can re-import a fresh export any time and only the changes are applied.

After importing, the **Roster** button on the Donors page opens a printable **Community roster** grouped by household, with a **Download PDF** button.

Add donors by hand

Click **New donor**. Enter the **Full name**, optionally a shorter **Display name** for receipts, and the Bahá'í ID if known. Tick **Registered Bahá'í member** for members; leave it clear for friends of the Faith who contribute to local activities. Use **Anonymous donor** only for a standing anonymous record.

Watch out. Donor records are confidential. Treat the data file and its backups as you would the paper receipt book.

7. Record your first contribution

You are ready. Open **Transactions** and click **New transaction**. Leave the type on **deposit**, enter the amount, choose the cash account the money went into, pick the donor, allocate the amount to a fund, and click **Save transaction**. A receipt is issued automatically. Part 3 walks through every field.

Stewardship · Treasurer's Manual

21 / 78

8. Adopting mid-year, or taking over from spreadsheets

Stewardship deliberately has no spreadsheet importer. Re-entering the current year by hand is the fastest way to learn the app, and it surfaces classification questions while the prior treasurer is still reachable. Most Assemblies finish in an afternoon.

The recipe:

1. **Opening balances as of May 1.** In the wizard or in **Settings** → **Cash accounts**, enter each account's balance on May 1 of the current fiscal year, with an **Opening balance date** of May 1. Use the figure from the prior treasurer's April 30 reconciliation if there was one, otherwise the bank statement balance.
2. **Outstanding items from before May 1.** Enter any check written before May 1 that had not cleared, and any deposit made before May 1 that had not appeared on the statement, under **Opening items** for that account. Skip this step if you used the bank statement balance in step 1 and there were no stragglers.
3. **Budget.** Enter the approved annual budget on the Funds page.
4. **Re-enter the year to date.** Work forward from May 1 through today, one transaction at a time, from the prior records and bank statements. Use the OCS import for online contributions rather than typing them. For contributions that were already receipted by the prior treasurer, choose the donor anyway so Stewardship's receipt sequence is complete; you do not need to send those receipts again.
5. **Reconcile each statement in order.** Starting with the May statement, run a reconciliation for each month (Part 4). If every month lands at a \$0.00 variance, the re-entry is complete and correct.
6. **Close the reconciled months** on the Monthly Reports page so their figures are locked.

Tip. If the prior treasurer's records disagree with the bank, the bank is right. Record what the bank shows and note the discrepancy for the LSA.

Onboarding checklist

Print this and tick as you go.

- ☐ Installed Stewardship and opened it once

- ☐ Created the year folder (for example Documents/Bahai/182 – 183 BE/) and pointed the app at it
- ☐ Completed the setup wizard with the Assembly name, treasurer, fiscal year, and May 1 balances
- ☐ Entered prior-year outstanding checks and deposits in transit, if any
- ☐ Settings → Assembly profile: address and locality code confirmed
- ☐ Settings → Treasurer signature uploaded (optional)
- ☐ Settings → Community counts entered
- ☐ Settings → Fiscal years: treasurer contact details set
- ☐ Settings → Cash accounts: savings or other accounts added, opening balances checked
- ☐ Funds: unused funds archived, missing funds added
- ☐ Funds: annual budget entered
- ☐ Donors: community list imported from eMembership, or key donors added
- ☐ First contribution recorded and its receipt downloaded
- ☐ Made a manual backup (Settings → Backup & restore → **Back up database**)

Part 2 · The start of the fiscal year

Every May 1 a new fiscal year begins. If you are a returning user, the heavy lifting already happened when you ran **Start new fiscal year** at the end of April (Part 5 explains that flow). What remains is a short list of checks and entries that set the year up for clean reporting. Do them in the first week of May and the rest of the year takes care of itself.

If this is your very first year with Stewardship, Part 1 already covered these steps. Skip to Part 3.

1. Confirm you are in the new year's file

Open **Settings** → **Data file**. The card shows the file you are working in under *Currently working with*. The path should be the new year's folder, for example `.../183 - 184 BE/stewardship.db`, and the **Fiscal years** card above it should show the new year label with an **Open** badge.

The sidebar footer also shows the active file's label at all times.

If the old year is still active, click **Switch to this** next to the new year's entry. The app restarts on the new file.

2. Verify what carried forward

The rollover copies your setup, not your history. Confirm each item on the **Dashboard** and in **Settings**:

Carried forward	Check
Cash account opening balances	Dashboard → Cash accounts table → <i>Opening</i> column. Each should equal the account's journal balance at April 30 (or the figure you adjusted during rollover). Fix any in Settings → Cash accounts → pencil.
Outstanding items	Settings → Cash accounts → Opening items on each account. Any check or deposit still uncleared at April 30 should be listed with an Outstanding badge.

Carried forward	Check
Funds and budgets	Funds & Budgets page. Each budget is the <i>Budget (current FY)</i> figure saved on last year's NSA Report page, or last year's budget where none was entered.
Donors	Donors page. Everyone is there; archived donors stay archived.
Assembly profile and community counts	Settings → Assembly profile and Community.

Transactions, receipts, reconciliations, and the audit cycle did **not** carry forward. The new year starts with an empty journal and receipt number 1, which is what the auditors expect.

Why this matters. The opening balance is the only number in the new file that comes from the old one. Everything else derives from transactions you enter this year. Get the opening balances right in May and every reconciliation and every Balance Sheet for the rest of the year will be right too.

3. Enter the approved budget

If you entered the proposed budget on the NSA Report page before rolling over, it is already here and this step is a quick review. If the LSA adopts or amends its budget after the rollover:

1. Open **Funds & Budgets**.
2. For each fund, click the **pencil** on its row, type the new annual amount in the **Target** (income) or **Budget** (expense) column, and press **Enter**.
3. Zero out or archive funds the LSA has dropped, and add any new ones with **New fund**.

Budgets are annual. The Monthly Report divides each by nineteen to show a per-month figure, and multiplies by the number of months elapsed for the year-to-date figure. Income funds show a **Target**; expense funds show a **Budget**. The label is different but the idea is the same.

Click **Download PDF** on the Funds page to keep a dated copy of the adopted budget for the minutes.

4. Update the community counts

Participation percentages on the Monthly Report compare unique donors against the total community. Start the year with fresh numbers:

1. Export a new community list from eMembership and import it on **Donors** → **Import community list** (Part 1, step 6). New members are added; changed names and addresses are updated.
2. Open **Settings** → **Community** and confirm the four counts (Adults, Youth, Pre-Youth, Children). Click **Edit** to adjust.

When you close each month during the year you will be asked to confirm these counts. The closing snapshot is what the report uses permanently, so keeping Settings current means fewer edits at close.

5. Confirm the treasurer's details

If the treasurer changed at the annual election, or your contact details changed:

- **Settings** → **Assembly profile** → **Edit**: treasurer name and Assembly mailing address (shown on receipts and reports).
 - **Settings** → **Fiscal years** → **Edit treasurer**: address and phones for this year's NSA report signer block.
 - **Settings** → **Treasurer signature**: upload the new treasurer's signature image, or remove the old one.
-

6. Run the first OCS import of the year

The OCS *Holding Account Daily Activities* report covers a rolling ninety days, so an early-May download spans both fiscal years. Import it into the new file anyway:

1. **Transactions** → **Import OCS**, pick the `.xls` file.
2. Rows dated before May 1 are flagged **Outside FY** and skipped automatically. Rows dated on or after May 1 are staged as **Will post**.
3. Click **Import N entries**.

If any April rows are still missing from the old year's file, open that file (Settings → Data file) and import the same download there. The same rows will be *Outside FY* in one file and *Will post* in the other. Part 3 covers the OCS import in full.

7. Make a backup

Stewardship writes an automatic daily snapshot beside your data file, but the start of a year is a natural moment for a deliberate copy. Open **Settings** → **Backup & restore** and click **Back up database**. Save the file somewhere other than the data folder, such as a cloud-synced folder or a USB drive.

Start-of-year checklist

- ☐ Settings → Data file shows the new year's file; Fiscal years card shows the new label
- ☐ Dashboard opening balances match the April 30 reconciled balances
- ☐ Outstanding checks and deposits in transit from April are listed under Opening items
- ☐ LSA-approved budget entered on the Funds page; dated Budget vs. Actual PDF saved for the minutes
- ☐ Fresh eMembership list imported; Settings → Community counts updated
- ☐ Treasurer name, address, phones, and signature current
- ☐ First OCS import of the year posted
- ☐ Manual backup made

Part 3 · Day-to-day operations

This is the part you will use most. It covers everything that happens between month-ends: money arriving, money leaving, and the occasional correction. None of it takes long. A treasurer who records activity as it happens spends about fifteen minutes a week here.

The rhythm that works. Record each contribution the day you receive it, so the receipt goes out promptly. Record each check the day you write it, with the check number. Import OCS activity at least once a month, before you reconcile. Everything else is optional.

1. Recording a contribution

A contribution is a **deposit** transaction. You say how much, where it went, who gave it, and which funds it is for.

May 9, 2025	1 Jamál	Contribution — Núráníyyih Rawhání Ref: CHK 1042	DEPOSIT	Bank Checking	\$500.00

The Transactions page: cash tiles, the three entry buttons, and the journal with search and filters.

1. Open **Transactions** and click **New transaction**. The type defaults to **Deposit**.
2. Fill in the **Details** card:
 - **Date**: defaults to today. Use the date you received the money.
 - **Amount**: for example 250.00 .
 - **Cash account**: where the money went. *Bank Checking* if you deposited it directly; *Petty Cash / Undeposited* if it is sitting in an envelope waiting for a bank run (see *Cash collected at Feast* below).
 - **Description**: a short human note that appears on the receipt and in reports, for example Contribution — check #1187 .
 - **Reference #** (optional): the donor's check number.
3. Fill in the **Receipt** card:

Stewardship · Treasurer's Manual

29 / 78

- **Donor:** pick from the list to issue a receipt. Choose **Anonymous** for an unnamed gift. Choose **Other / new donor...** to type a one-off name. Leave **Skip — no receipt issued** for money that is not a contribution, such as bank interest or a refund.
- **Payment method:** cash, check, online, ACH, wire, in-kind, or other.

4. Fill in the **Fund allocations** card:

- The **Remaining** counter starts at the full amount and must reach **\$0.00** before you can save.
- The first row is created for you. Choose the **Fund** and confirm the **Amount**.
- To split the gift, click **Add allocation**. The new row pre-fills with whatever is left.
- If the donor designated part of the gift for a purpose, or for a national or international fund, allocate that part to *Earmarked Contributions*, tick **Restricted to a purpose** on that row, and type the purpose, for example National Bahá'í Fund . The app shows an amber *Heads up* if you allocate a contribution directly to a transmittal or expense fund; it will still save, but the cleaner pattern is earmark in, transmittal out (see *Transmittals* in section 3).
- **Donor count:** leave blank for a single donor. For a Feast envelope containing gifts from several people, enter how many people gave. This feeds the participation percentage on the Monthly Report.

5. Click **Save transaction**.

Stewardship · Treasurer's Manual

31 / 78

A contribution split across two funds. The form will not save until Remaining reads \$0.00.

Why this matters. The split is where your reporting comes from. A \$500 check marked “\$400 Local, \$100 National” becomes \$400 of Local Fund income and \$100 of earmarked income you owe onward. Get the allocation right at entry and the Monthly Report, the Statement of Activities, and the NSA report all come out right without any further work.

Cash collected at Feast

Cash and checks collected in the Feast contribution box are usually deposited a few days later. Record them in two steps so the books always match reality:

1. **On Feast night**, record one deposit per envelope or per donor to the **Petty Cash / Undeposited** account. Name the donor where a name is given so receipts are issued; use **Anonymous** with a **Donor count** for a loose-cash envelope.
2. **When you deposit at the bank**, record a **transfer** from *Petty Cash / Undeposited* to *Bank Checking* for the total deposited. The bank deposit will then match one transfer when you reconcile.

2. Receipts

Receipts issue themselves. The moment you save a deposit with a donor selected, Stewardship assigns the next sequential number and creates the receipt with the NSA’s required disclaimer text and your signature block.

Numbering. Strictly sequential, never reused. If you void a receipt its number stays in the sequence as a visible gap, exactly as with a paper receipt book, and the next receipt takes the next number.

Finding a receipt. Open **Receipts** in the sidebar. The list shows number, date, donor, method, amount, and an **Issued** or **Void** badge. Click a row to open it.

 No goods or services were provided in consideration for this contribution unless noted.

Ardishir Khán, Treasurer

Spiritual Assembly of the Bahá'ís of Rivertown

Spiritual Assembly of the Bahá'ís of Rivertown - Receipt #1001

The receipt PDF a donor receives, with the NSA disclaimer text and the treasurer's signature block.

Voiding a receipt. Click **Void** on the receipt page. Use this when a receipt was issued in error, for example the wrong donor. Voiding the receipt does not change the transaction; fix the transaction separately (section 7). **Un-void** reverses it.

OCS contributions have no receipts. Online contributions imported from OCS are recorded as one aggregate deposit per day and produce no individual receipts, because the NSA's portal already sent each contributor one. Never re-receipt an OCS gift.

Tip. Upload a signature image once under **Settings** → **Treasurer signature** and every receipt PDF carries it. Without one, receipts show your typed name, which is perfectly acceptable.

3. Recording an expense

An expense is a **withdrawal**. The allocation says which fund the money came from.

1. **Transactions** → **New transaction**, then click **Withdrawal** in the Type row.
2. **Details**: date, amount, the cash account the money left (normally *Bank Checking*), a description such as the payee, and the **check number** in *Reference #*.
3. **Fund allocations**: one row per fund charged. A Feast refreshment reimbursement goes to *Feast / Holy Days*; a check to the National Treasurer goes to *National Bahá'í Fund*. Split across funds if one check covers several purposes. Remaining must reach \$0.00.
4. **Save transaction**.

Transmittals. When you send contributions up to the National, Continental, or International funds, record the check as a withdrawal allocated to the matching *Transmittals* fund. The Statement of Activities and the NSA report both pick these up as payments to those funds. The pattern is always two entries: the donor's gift comes in as earmarked income, and your check goes out as a transmittal withdrawal.

Bank fees and interest. Record a fee as a withdrawal to *Administrative Expenses* and interest as a deposit to *Other Income* with **Skip — no receipt issued**. You can also add these directly from the reconciliation screen when they turn up on the statement (Part 4).

4. Transfers between accounts

A **transfer** moves cash from one account to another and touches no fund. Use it for a bank deposit of collected cash (Petty → Bank), a sweep to savings (Bank → Savings), or a manual OCS payout (OCS Holding → Bank).

1. **Transactions** → **New transaction**, then click **Transfer**.
2. Enter the date, amount, description, **From account**, and **To account**.
3. **Save transaction**. There is no allocations card.

Transfers from OCS Holding to your bank are normally created for you by the OCS import; you rarely need to type one.

5. Importing OCS activity

The NSA's Online Contribution System (OCS) publishes a **Holding Account Daily Activities** report for your locality. Importing it posts the online contributions and the electronic transfers to your bank in one step, instead of typing each line.

Stewardship
LSA Treasurer

← Back to transactions

Import OCS report

Upload the NSA's Holding Account Daily Activities .xls. Each contribution becomes a deposit on OCS Holding; each electronic transfer becomes an OCS Holding → Bank transfer.

Source file

Download the report from the OCS portal: Reports → Holding Account → Daily Activities. Save as .xls and upload here.

[Pick a .xls file](#)

Pick the Daily Activities .xls file; the app stages every row and tells you what it will do with each.

Three rules

1. **The download covers a rolling ninety days.** Rows from another fiscal year are flagged **Outside FY** and skipped. Open that year's file to import them.
2. **Duplicates are detected by content, not by row number.** The report renumbers its *No.* column on every download, so Stewardship matches on date, amount, and type. A row already in your journal shows **Already posted** and is skipped. You can import overlapping downloads freely.
3. **No receipts are issued.** Each activity row becomes one aggregate deposit on *OCS Holding* such as *OCS contributions · 12 donors*, allocated to the default fund. The NSA already receipted each donor.

Procedure

1. In the OCS portal go to **Reports** → **Holding Account** → **Daily Activities** and download the `.xls`.
2. In Stewardship open **Transactions** and click **Import OCS**.
3. Click **Pick a .xls file** and choose the download. The app shows the locality, date range, and entry count.
4. Check the **Posting choices**: the OCS Holding account, the destination bank account for transfers, and the default fund for contributions (normally *Local Fund*). These are remembered from setup.
5. Review the **Staged entries** table. Every row shows its status: **Will post**, **Already posted**, **Outside FY**, or **Skipped**. Untick anything you do not want.
6. Click **Import N entries**.

Contributions appear as deposits on OCS Holding; each electronic payout appears as a transfer from OCS Holding to your bank.

Tip. If a portion of an OCS deposit was earmarked by donors for a national or international fund, edit the imported deposit afterwards and split its allocation. The OCS report lists the fund designations.

6. In-kind contributions (contributed expenses)

When a community member buys the Feast refreshments and declines reimbursement, the Assembly has received a gift and incurred an expense at the same time, with no cash moving. The donor is entitled to a receipt.

1. Open **Transactions** and click **Contributed expense**.

Record contributed expense

A member paid for something out of pocket and is donating the receipt instead of asking for reimbursement. We'll record it as both income and offsetting expense (no cash moves) and issue a receipt for tax purposes.

Details

The amount is the value of what was contributed (the total on their receipt). The donor + description appear on the tax-deductible receipt we issue.

Date *

09/02/2026

Amount *

\$ 0.00

Total on the donor's receipt.

Donor *

Search donors...

Description *

e.g., Food for Naw-Rúz Feast

What the contribution was for. Appears on the receipt.

Vendor / source (optional)

e.g., Trader Joe's, Costco

Where the goods or services were purchased.

Income recognition

Where the contribution lands as income. "Contributed Expenses" is the standard NSA category and is the default; you can change this if the gift was specifically designated for another contribution fund.

Income fund *

Contributed Expenses

Expense offset

Which fund(s) the contribution covered. Splits must sum to the amount.

Expense fund

Amount

Pick a fund...

\$ 0.00

🗑️

+ Add allocation

REMAINING

\$0.00

On save: a deposit + matching withdrawal post to a hidden In-Kind Clearing account (net cash impact \$0), and a receipt is issued with payment method "in-kind" for tax purposes.

Cancel

Record & issue receipt

One form records the in-kind gift as income, the matching expense, and issues the receipt.

- Details:** date, the amount on the donor's own store receipt, the **Donor**, a description of what was purchased, and optionally the vendor.
- Income recognition:** confirm the income fund, normally *Contributed Expenses*.
- Expense offset:** allocate the same amount to the expense fund or funds that benefited. Remaining must reach \$0.00.
- Click **Record & issue receipt**. The app opens the new receipt, whose payment method is *in-kind*.

Stewardship · Treasurer's Manual

38 / 78

Behind the scenes Stewardship records a matched deposit and withdrawal on the hidden *In-Kind Clearing* account, so cash on hand is unchanged while income and expense are both recognized. The auditor package reports the year's in-kind total separately.

7. Fixing mistakes

Every treasurer makes them. Stewardship makes corrections safe by never deleting anything.

Edit a transaction. Open **Transactions**, find the row (use the search box or the type and account filters), and click it. Change what is wrong and save. Every change is written to the transaction's **History** card with a timestamp and the before-and-after values.

Void a transaction. If the entry should never have existed, open it and click **Void this transaction**. You must enter a reason; it is recorded permanently. Voided transactions stay in the list with a **Void** badge, are excluded from every balance and report, and can be restored with **Un-void**. Voiding a deposit does not void its receipt; void that separately if needed.

Locked transactions. A transaction in a closed Bahá'í month shows a **Locked** badge and a banner reading *This Bahá'í month is closed*, and cannot be edited or voided. To correct it, open **Monthly Reports**, select that month, click **Reopen**, make the fix, and close the month again. Reopening is normal and leaves a trail in the Activity Log.

Wrong fund. Edit the transaction and change the allocation. No need to void.

Wrong receipt. Void the receipt on the Receipts page, then correct the transaction. If the correction is a different donor, the app will not issue a fresh receipt for an existing transaction; void the transaction and re-enter it instead.

Watch out. Never try to “fix” a balance by entering an adjustment you cannot explain. If the bank and the journal disagree, the reconciliation screen (Part 4) will show you exactly which transaction is missing or wrong.

8. Donors

Soraya A.	Soraya Ardekani	8800116		

Donors: the community list with Roster, Import community list, and New donor.

- **New donor:** full name, display name for receipts, Bahá'í ID, notes. Tick **Registered Bahá'í member** for members. Non-Bahá'í friends who contribute to local activities are entered with that box clear.
- **Edit:** click the pencil on a row.
- **Archive:** click the archive icon. Archived donors leave the receipt form but keep their history. **Show archived** reveals them.
- **Import community list:** refresh the whole list from a new eMembership export at any time. Matching is by Bahá'í ID.
- **Roster:** a printable community roster grouped by household, built from the imported records.

9. The Activity Log

Activity Log in the sidebar records every change to financial data: transactions created, edited, or voided; receipts issued or voided; donors, funds, cash accounts, and periods changed. Entries are written by the database itself and cannot be edited or deleted, even by the developer. Filter by entity type, action, or date range, and click **View snapshot** on any entry to see the exact before and after.

No activity recorded yet

The log records every financial change automatically — transactions, receipts, donors, funds, and periods all appear here as they are created, edited, or voided.

The Activity Log: every change, filterable, with before-and-after snapshots.

You will rarely need it, but auditors love it, and it is what lets you reopen and correct a month without anyone wondering what happened.

Day-to-day cheat sheet

Situation	Do this
A member hands you a check at Feast	Deposit → Petty Cash / Undeposited → donor → allocate. Transfer Petty → Bank when you deposit it.

Situation	Do this
Loose cash in the Feast box	Deposit → Petty → Anonymous → Donor count = number of givers.
Check arrives by mail, you deposit it the same day	Deposit → Bank Checking → donor → allocate.
Donor gives \$500, wants \$100 of it for the National Fund	One deposit, two rows: \$400 Local Fund; \$100 Earmarked Contributions, Restricted to a purpose = National Bahá'í Fund. Transmit later as a withdrawal to <i>National Bahá'í Fund</i> .
Donor gives for a specific local purpose	Allocate to <i>Earmarked Contributions</i> , tick Restricted to a purpose , type the purpose.
You write a check to the National Treasurer	Withdrawal → Bank Checking → check # in Reference → allocate to <i>National Bahá'í Fund</i> .
You reimburse someone for Feast refreshments	Withdrawal → Bank Checking → allocate to <i>Feast / Holy Days</i> .
Someone declines reimbursement	Contributed expense → donor → expense fund. Receipt issues automatically.
Online contributions this month	Download OCS Daily Activities → Import OCS .
Bank fee on the statement	Withdrawal → <i>Administrative Expenses</i> , or Add transaction during reconciliation.
Interest on the statement	Deposit → <i>Other Income</i> → Skip — no receipt issued .
You typed the wrong amount	Open the transaction → edit → save.
You entered something twice	Open the duplicate → Void this transaction → give a reason.
Transaction shows Locked	Monthly Reports → that month → Reopen → fix → close again.

Part 4 • Month-end: reconcile, report, close

Once a month, when the bank statement arrives, you do four things in order: bring the journal up to date, reconcile it to the bank, review and print the Monthly Report, and close the Bahá'í month. Done in this order, month-end takes thirty to forty-five minutes and the year-end audit becomes a formality, because every month has already been proven against the bank.

Two calendars, one routine. Your bank sends statements by calendar month. Stewardship reports by Bahá'í month, which is nineteen days. That is fine: you reconcile *per bank statement* and you report and close *per Bahá'í month*. A Bahá'í month is ready to close once every transaction in it has been recorded and the bank statement covering its last day has been reconciled. In practice you will often close two Bahá'í months after one bank statement.

The month-end routine

1. **Catch up the journal.** Enter any contributions or checks you have not recorded yet. Record the transfer for any cash you deposited.
 2. **Import OCS.** Download a fresh Daily Activities report and import it (Part 3, section 5). Duplicates are skipped, so overlap is harmless.
 3. **Reconcile the bank statement.** Section 1 below. Repeat for any savings account with its own statement.
 4. **Review the Monthly Report.** Section 2. Read it as the community will.
 5. **Download the PDF** and bring it to Feast. Section 3.
 6. **Close the month.** Section 4. This locks the figures and records the membership count.
 7. **Back up** if you made a large batch of entries (Settings → Backup & restore → **Back up database**).
-

1. Reconciling the bank statement

Reconciliation proves that your journal and the bank agree. You do it one cash account at a time, once per statement.

How the worksheet thinks

Bank side	Journal side
Statement ending balance	Opening balance (audited)
– Outstanding checks (issued, not yet cleared)	+ All journal activity through the statement date
+ Deposits in transit (made, not yet on the statement)	= Journal balance
= Adjusted bank balance	

Variance = adjusted bank balance – journal balance. The goal is \$0.00. When it is zero, every dollar the bank shows is explained by a transaction in your journal, and every transaction in your journal is either on the statement or legitimately still in transit.

Stewardship v1.4.0

Bank Reconciliation

Match the journal to your bank statement, month over month. The audit worksheet's reconciliation rows (081/083/097) are produced from these records.

+ New reconciliation

All reconciliations

Most recent first. Click a row to open the working view.

STATEMENT DATE	CASH ACCOUNT	STATEMENT BALANCE	VARIANCE	ITEMS	STATUS	ACTIONS
Jun 30, 2025	Bank Checking	\$14,480.10	—	2/3 cleared	IN PROGRESS	Delete
May 31, 2025	Bank Checking	\$13,250.00	\$0.00	2/2 cleared	BALANCED	Delete

The Reconciliation page lists every statement reconciled so far with its status.

1. Open **Reconciliation** in the sidebar and click **New reconciliation**.
2. In the **Statement** card:
 - **Cash account**: the account the statement is for (normally *Bank Checking*).
 - **Statement date**: the closing date printed on the statement, not today.
 - **Ending balance**: the closing balance exactly as printed.
 - **Notes** (optional).
 - **Attach statement...** (optional): point at the PDF or image of the statement. Stewardship records the file's location so it is one click away at audit time.
3. Click **Start reconciling**.

The screenshot shows the Stewardship LSA Treasurer application interface. On the left is a sidebar with a navigation menu. The main content area is titled 'New reconciliation' and contains a form for entering statement details. The form includes fields for 'Cash account' (a dropdown menu), 'Statement date' (a date picker set to 09/02/2026), 'Ending balance' (a text input set to 0.00), 'Notes' (a text area), and 'Statement attachment' (a file upload button labeled 'Attach statement...'). At the bottom right of the form are 'Cancel' and 'Start reconciling' buttons. The sidebar menu includes sections for Dashboard, Bookkeeping, Month-End, Manage, Year-End, and System, with 'Reconciliation' highlighted under the Bookkeeping section.

Stewardship v1.4.0

Stewardship · Treasurer's Manual

46 / 78

Tick each item that appears on the statement. The variance updates live.

1. Go down the bank statement line by line. For each line, find the matching transaction in the working set and tick **Cleared**. The app records today as the cleared date; change the **Cleared on** field if you want the bank's posting date.
2. Use the **All / Outstanding / Cleared** tabs to focus on what is left.
3. If the account carried opening items from last fiscal year, they appear in a separate **Opening carryover items** section above. Tick them off when they clear.
4. Watch the **Variance** figure. When you have ticked everything on the statement it should read **\$0.00**.

If the variance is not zero

Work down this list. The culprit is almost always in the first three.

1. **A bank fee or interest credit you have not recorded.** Click **Add transaction** in the working-set header, enter it inline, and click **Add to reconciliation**. It is saved to the journal and cleared in one step.
2. **A statement line with no matching transaction.** A deposit or check you forgot to enter. Add it the same way.
3. **The ending balance was mistyped.** Click **Edit** in the Statement card, correct it, and click **Save & refresh working set**.
4. **A transaction with the wrong amount.** Click its description to open it, fix it, come back, and click **Refresh** in the working-set header to pull in the change.
5. **A duplicate.** Open it and void it with a reason, then **Refresh**.
6. **An item ticked that is not actually on the statement.** Switch to the **Cleared** tab and compare.

A **negative** variance means the bank side is below the journal: something in the journal has not been matched, or the bank took money you have not recorded. A **positive** variance means the bank has money the journal does not know about: a missing deposit or interest.

Finish

When the variance reads **\$0.00**, click **Mark complete**. The reconciliation locks and shows a **Balanced** badge in the list.

If you cannot find the last few cents and must move on, the button reads **Complete with off-by [amount]**. It records the difference honestly. Come back later, click **Reopen**, and finish the hunt. Auditors will see the off-by amount, so aim to resolve it before year-end.

Other accounts

- **Savings** accounts with their own statements are reconciled exactly the same way.
 - **OCS Holding** has no bank statement, but the OCS portal shows the holding balance and every payout. Reconciling it against the Daily Activities report each month is optional and takes two minutes once the import is done; it confirms nothing was missed.
 - **Petty Cash / Undeposited** should normally be \$0 after each bank run. If it is not, you have cash in hand that has not been deposited or a transfer you have not recorded.
-

2. Reviewing the Monthly Report

182 - 183 BE
Stewardship v1.4.0

The Monthly Report for one Bahá'í month, ready to preview or download for Feast.

The headline figures

Figure	Meaning
Starting cash / Cash on hand	Total across all accounts at the start and end of the month
Income · month / Expenses · month	Contributions received and disbursements made this month
YTD income / YTD expenses	The same, from May 1 through this month
Earmarked YTD	Year-to-date contributions designated for a stated purpose
Local Goal YTD	Year-to-date contributions toward the Local Fund target
Donors · month / YTD	Unique contributors this month and this year
% contribution · month / YTD	Donors as a percentage of the community, using the membership count recorded at close

Below the tiles is **Cash by account**, then four fund tables (Income, Transmittals, Local Expenses, Administrative), each with the month's budget, actual, and variance, and the same three columns year-to-date. The monthly budget is the annual budget ÷ 19; the year-to-date budget is that figure × the number of months elapsed.

Reading the variance

The Monthly Report uses a **favorable-positive** convention: a positive, green number is always good news and a negative, red number always warrants a sentence of explanation.

- **Income rows:** variance = actual – target. Positive means the community gave more than planned.

- **Expense rows:** variance = budget – actual. Positive means the Assembly spent less than planned.

A fund with no budget shows a dash. That is not an error; it means nobody set a target for it.

What to check before you print

- Cash on hand equals the reconciled bank balance plus any savings, OCS Holding, and undeposited cash. If the bank is reconciled, this is automatically true.
- Every transaction in the period's transaction list (bottom of the PDF) is one you recognize.
- Nothing large sits in *Other Income* or *Other Expenses* that belongs in a named fund.
- The donor count looks right for what actually happened at Feast.

3. Presenting at Feast

Click **Preview PDF** to see the document on screen, then **Download PDF**. The file is named `monthly-report-<year>-<NN>-<Month>.pdf`.

Page 1 is the handout: the Assembly name and Bahá'í month, the cash strip, the four fund tables with budget and variance, a **Total income / Total expenditures / Net surplus (deficit)** block, the participation figures, and the full list of the month's transactions.

Page 2 is a bar chart of contributions by Bahá'í month for the year so far, with the monthly goal drawn as a line. Only months up to the selected one are plotted, so a report reprinted later looks the same as it did at the time.

Page 2: contributions by Bahá'í month against the monthly goal.

Tip. The community does not need a lecture. Three sentences cover it: cash on hand, this month's income against the goal, and anything unusual in the expenses. Then invite questions. The PDF does the rest.

For LSA meetings between Feasts, the **Dashboard** shows live cash and fund balances, and every figure in its fund table can be clicked to list the transactions behind it. The **Funds & Budgets** → **Download PDF** button produces a year-to-date Budget vs. Actual when the LSA wants the whole year on one page.

4. Closing the month

Closing a Bahá'í month locks its transactions and freezes the membership count used for participation percentages. Close a month once its bank statement is reconciled and you have presented the report.

1. On **Monthly Reports**, select the month.
2. Click **Close period**.
3. A panel asks you to confirm the **membership snapshot**: Adults (21+), Youth (15–20), Pre-Youth (11–14), Children (0–10). The values are pre-filled from **Settings** → **Community**. Adjust them if the community changed during this month. Leave a category blank if unknown.
4. Click **Confirm close**.

The month now shows a **Closed** badge with its closing date, and every transaction in it shows **Locked** on its edit page.

To make a correction later, select the month and click **Reopen**. Fix the transaction, then close the month again. Both actions are recorded in the Activity Log. Reopening a month does not disturb any reconciliation.

Why this matters. Closing is what turns a month from “probably right” into “proven and frozen”. At year-end, the New Fiscal Year screen warns you if any month is still open, because the opening balances it proposes are only as good as the months behind them.

Month-end checklist

- ☐ All contributions and checks recorded; cash deposits recorded as Petty → Bank transfers
- ☐ OCS Daily Activities downloaded and imported
- ☐ Bank Checking reconciled to the statement, variance \$0.00, marked complete
- ☐ Savings (if any) reconciled
- ☐ Statement PDF attached to the reconciliation
- ☐ Petty Cash / Undeposited balance is \$0 or explained
- ☐ Monthly Report reviewed: cash matches, transactions recognized, variances make sense
- ☐ Monthly Report PDF downloaded and shared at Feast
- ☐ Bahá'í month(s) covered by the statement closed, with membership counts confirmed
- ☐ Backup made if a large batch of entries was posted

Part 5 • Year-end: annual reports, the audit, and the new year

The fiscal year ends April 30. If you have reconciled and closed every month, year-end is mostly clicking download buttons. This part walks the whole sequence: finishing the books, producing the annual statements, reporting to the LSA, preparing everything the auditors need, filing the NSA Treasurer’s Financial Report, and rolling into the new year.

The year-end timeline

When	Step	Section
April 30	Fiscal year ends. Post the last entries.	1
Early May	Final OCS import, April 30 reconciliation, close all nineteen months, back up.	1
May	Download the Statement of Activities, Balance Sheet, and Budget vs. Actual. Report to the LSA.	2, 3
May	Start the new fiscal year file so day-to-day work continues uninterrupted.	6
May – June	The LSA appoints two auditors. Fill in the audit answers, generate the audit bundle, hand it over, track findings.	4
By July 31	Enter the proposed budget, generate, sign, and submit the NSA Treasurer’s Financial Report.	5
After the audit	Mark the audit cycle complete. Archive the year’s file.	7

You can start the new year (section 6) before the audit is finished. The old year’s file stays open for the auditors’ questions and you switch between them in **Settings** → **Data file**.

1. Finish the books

1. **Post everything dated on or before April 30.** Contributions received, checks written, the transfer for the last cash deposit.
 2. **Run a final OCS import.** Download the Daily Activities report in early May and import it into the expiring year's file. Rows dated May 1 or later are flagged *Outside FY* and skipped; import the same file again into the new year's file later.
 3. **Reconcile the April 30 bank statement** for every bank and savings account (Part 4). The year-end reconciliation must be **complete** for the primary bank account, because the auditor package reads its cleared balances. Aim for a \$0.00 variance; an off-by amount will appear in the package.
 4. **Close all nineteen months on Monthly Reports.** Month 19, Jalál, runs to April 30.
 5. **Back up. Settings → Backup & restore → Back up database.** Name it for the year and keep it somewhere other than the data folder.
-

2. The annual statements

Three PDFs describe the year. The first two come from the **Audit** page; the third from the Funds page.

Set the fiscal year on the Audit page

Open **Audit** in the sidebar. Two selectors in the page header control every card below: **Fiscal year**, which should show the year you are closing, and **Bank account**, the primary checking account the auditor package reconciles.

Audit

Prepare the annual audit handoff — the bank-statement reconciliation, supporting documents for the NSA Online Audit System, and the audit cycle.

2025-2026

Bank Checking

Stewardship Auditor Package

Everything the auditors need for the NSA Online Audit System, on the bank-statement basis. Generate the PDF and upload it as the treasurer's artifact.

⚠️ Year-end bank reconciliation incomplete

Complete the year-end (April 30) bank reconciliation before generating the package — fields #2/#4/#6 depend on it. Latest statement on file: Jun 30, 2025.

Year-end statements

Audit-packet PDFs for the auditors. Statement of Activities sums income/expense by fund for the year; Balance Sheet shows cash on hand and fund balances as of the fiscal year end. Cash on hand should equal total fund balances — the Balance Sheet flags any discrepancy.

Statement of Activities

Balance Sheet

TOTAL INCOME (YEAR)

\$3,405.00

TOTAL EXPENSE (YEAR)

\$1,279.90

NET SURPLUS / (DEFICIT)

+\$2,125.10

TOTAL CASH ON HAND

\$14,775.10

TOTAL NET ASSETS

+\$14,775.10

CASH – NET ASSETS

\$0.00

5 allocations are booked to the wrong fund type

Income recorded against a non-contribution fund (or an expense against a contribution fund) nets to zero, so it never unbalances the Balance Sheet — but it makes the Statement of Activities' income subtotal disagree with its grand total, and a fund's figure differ between the two statements. Re-file each onto a fund of the correct type, or confirm it's intentional.

Fiscal year 2025-2026 · 2025-05-01 to 2026-04-30

Classification warning — 3 funds with income or expense on the wrong side

These amounts are included in the grand totals below but not in their section subtotal (Income lists only contribution funds; the other sections list expense), so a subtotal may not match its total. Re-file onto a fund of the correct type, or confirm it is intentional:

- Continental Bahá'í Fund (CBF) — \$125.00 income on a non-contribution fund
- National Bahá'í Fund (NBF) — \$850.00 income on a non-contribution fund
- Teaching / Proclamation (TEACHING) — \$200.00 income on a non-contribution fund

The Statement of Activities: income and expense by fund for the full year, with budget and variance.

It lists every active fund in four sections (Income, Transmittals, Local Expenses, Administrative) with its annual budget, actual, and variance, a subtotal per section, and a closing block of **Total income**, **Total expenditures**, and **Net surplus / (deficit)**.

Watch out. The year-end statements use a **directional** variance: variance = actual – budget, so a positive number always means “more than budgeted”. Colour tells you whether that is good: green for income above target, red for expense above budget. This is the reverse sign from the Monthly Report’s favourable-positive convention. Red means the same thing on both.

If any allocation was booked on the wrong side of the ledger (income to an expense fund, or the reverse), an amber block lists it, both on the Year-end statements card and in the PDF. These net to zero in the grand totals but make a section subtotal disagree with the total. Re-file each one onto a

fund of the right type, or confirm it is intentional, before you send the statement anywhere. Contributions designated for a national fund are the usual cause; Part 3 explains the earmark-in, transmittal-out pattern that avoids it.

Balance Sheet

Click **Balance Sheet**. The file is `balance-sheet-<year>.pdf`. It shows cash on hand by account at April 30, net assets by fund, and the difference between total cash and total net assets. **That difference must be zero.** A non-zero figure is shown in red with a note to investigate; it usually means an opening balance was entered without a matching fund allocation, or a transaction was edited after its period was closed and reopened.

The card also shows the year's total income, total expense, net surplus or deficit, total cash, and total net assets on screen, so you can sanity-check before downloading.

The Balance Sheet: cash by account and net assets by fund at April 30.

Budget vs. Actual

Open **Funds & Budgets** and click **Download PDF**. This is the year's budget performance fund by fund, the same figures the Funds page displays, in a format the LSA can file with its budget discussion for the coming year.

3. The annual report to the LSA

Stewardship does not produce a separate "annual report" document because the three statements above *are* the annual financial report. Present them together:

1. **Statement of Activities**: what came in, what went out, by fund, against budget.
2. **Balance Sheet**: what the Assembly holds at April 30 and how it is split across funds.
3. **Budget vs. Actual**: the basis for next year's budget conversation.

Add a short cover note: total income, total expenses, net result, cash on hand, the participation percentage from the Jalál Monthly Report, and any fund that finished the year with a balance the LSA should decide how to use. That, plus the twelve Monthly Reports already presented at Feast, is a complete account of the year.

4. Preparing for the audit

The NSA's **Online Audit System (OAS)** asks the Assembly's two auditors to review the treasurer's records and answer a structured questionnaire. Stewardship produces every document the OAS asks for that can come from the books, plus a package that answers the numeric questions directly. Your job is to fill in a few attestations, generate the bundle, and add the documents that live outside the app.

Step 1 · Answer the treasurer's questions

At the top of the Audit page, in the **Stewardship Auditor Package** card, expand **Audit answers (treasurer-provided)** and complete:

Question	Answer with
Authorized signers	Names of the people who can sign on the bank account
Who reconciles the bank account	Normally the treasurer

Question	Answer with
Who reviews the treasurer's work	The LSA member or officer who reviews your reports
Pre-numbered checks in use	Yes / No
Voided checks retained	Yes / No
Written reconciliation report kept	Yes. Stewardship's reconciliations are the report
Reports at meetings / Feasts	Yes, if you presented the Monthly Report
Prior-year audit reviewed by LSA	Yes / No
Prior-year recommendations acted on	Yes / No
Observations	Anything the auditors should know: an off-by reconciliation, a late deposit, a change of treasurer mid-year

Click **Save answers**. They are printed verbatim in the package.

Step 2 · Generate the auditor package

The **Stewardship Auditor Package** card requires a completed April 30 reconciliation; if it is missing, the card says so in red and the download is disabled. Once it is complete, the card shows three check tiles: the first two should be green, and the third is green or, if OCS money was in transit at April 30, amber with the difference explained. **Download Auditor Package** produces `auditor-package-<year>.pdf` containing:

1. **Documents provided**: the D1–D13 table showing what the app generated and what you attach.
2. **Bank accounts (all)**: beginning and ending statement balances, ending journal balance, and reconciliation status for every bank and savings account.
3. **Part 1 · Bank reconciliation**: the reconciliation figures for the selected bank account, with the Bank – Cash check.
4. **Part 2 · Contributions / deposits**: total bank deposits, OCS transfers, receipted deposits, and their check.
5. **Part 3 · Receipts vs deposits**: total receipts including OCS, in-kind expenses, and an automatic explanation of any difference (OCS money in transit, or cash still undeposited at April 30).
6. **Treasurer attestations**: your saved answers plus indicators computed from the journal, such as months reconciled and deposit timeliness.

Every figure is labeled with the question number printed on the OAS e-form (1, 2, 4 through 7, 9, 10, 12 through 15, 19, 20a, 20b, 22, 23, 25), so the auditors copy each value straight into the matching box. Nothing needs to be re-derived by hand.

Step 3 · Download the document bundle

The OAS **Document Center** organizes evidence into thirteen categories, D1 through D13. The **Audit documents — OAS Document Center** card lists all thirteen and generates the ones that can come from the books:

D	Document	Source
D1	Cash Journal (all transactions)	Stewardship
D2	Contribution receipt records	Stewardship
D3	Bank statements, reconciliations, OCS summary	Stewardship generates the OCS summary. You attach the bank statements.
D4	Previous year's audit report	You attach
D5	Redacted LSA minutes with financial decisions	You attach
D6	Statement of Activities	Stewardship
D7	Balance Sheet	Stewardship
D8	Outstanding payments, all bank accounts	Stewardship
D9	Paid and outstanding bills and invoices	You attach
D10	Unusual or significant transactions	Stewardship (heuristic selection; review it)
D11	Petty cash schedule	Stewardship
D12	Bookstore inventory	Not applicable unless you run one
D13	Assets owned by the LSA	You attach

Click **Download bundle (.zip)** at the top of the card. The archive contains a handoff manifest (page 1 lists what is enclosed and what to attach; page 2 is an OAS e-form cheat sheet giving the answer to every numbered question), the auditor package, and every generated D-document as a separate PDF, named for its category. Unzip it, add the bank statements (the manifest lists every account's opening and closing statement balances, so you can see which statements belong in the set), the prior audit report, the redacted minutes, the invoices, and the asset list, and the auditors have everything.

Step 4 · Track the audit cycle

The **Audit cycle** card is your record of the audit itself.

1. Click **Start audit cycle for this fiscal year**, enter the two auditors' names (they must not be the treasurer), and click **Start cycle**.
2. Tick the **Document checklist** as you hand each item over. Add a note where useful, for example the date you emailed the bundle.
3. Record anything the auditors raise under **Findings**: description, severity, recommendation. Update each finding's status to *Resolved* or *Deferred* as the LSA acts on it.
4. When the auditors have submitted to the NSA, click **Mark complete**. If findings remain open, the button says so and the cycle records that honestly.

Next year's auditor answers ask whether the prior audit was reviewed and its recommendations acted on. The findings list is where you look.

Tip. Send the auditors the bundle *and* a copy of Part 5 of this manual. Most audit delays come from auditors not knowing what they are looking at. The package's first page tells them.

5. The NSA Treasurer's Financial Report

The NSA asks each Assembly to file its **Treasurer's Financial Report** after year-end: last year's actuals and budget, fund by fund, plus the budget the Assembly proposes for the year now under way. Stewardship generates the whole report as a PDF from your journal. It has its own page, **NSA Report**, under *Year-end* in the sidebar.

NSA Treasurer's Financial Report

2025-2026

Report where the year ended up, and propose next year's budget per fund — then download the PDF to send to the Office of the Treasurer.

The "Budget (current FY)" column is pre-filled with each fund's current budget. Edit it to propose next year's budget per fund; the values are saved and carried into the new fiscal year's Funds & Budgets when you roll the year over.

The NSA Report page: last year's actual and budget per fund, and the editable Budget (current FY) column.

1. Open **NSA Report** and confirm the **Fiscal year** selector in the header shows the year you are closing.
2. The **Annual report** card summarizes the community counts at April 30 from **Settings** → **Community**, then lists every fund by section with three columns: **Actual (prev FY)** and **Budget (prev FY)**, both filled from the journal, and **Budget (current FY)**, which is editable.
3. Enter the LSA's adopted budget for the new year in the **Budget (current FY)** column. It is pre-filled with each fund's existing budget, so you only change the lines the LSA changed. Leave a fund at zero if it has no budget.
4. Click **Save**. The proposed figures are stored with the closing year.
5. Click **Download PDF**. The file is `nsa-treasurer-report-<year>.pdf`.
6. Have the **incoming** Assembly review and approve the report at its first meeting after the election. The report's footer says so, and names the return address.
7. Send it to the Office of the Treasurer at the address printed in the footer (currently `finance@usnbc.org`) by **July 31**.

FINANCIAL REPORT TO THE NATIONAL SPIRITUAL ASSEMBLY

For fiscal year 2025-2026 · 2025-05-01 to 2026-04-30
 Spiritual Assembly of the Bahá'ís of Rivertown · RVTN · OR

PERSON COMPLETING REPORT

Name and Office: Ardishir Khán (Treasurer)
 Address: 128 Maple Street, Rivertown, OR 97000
 Home Phone: (503) 555-0148 · Work Phone: (503) 555-0199

This report must be reviewed and approved by the incoming Assembly/Group. Return by July 31 to finance@usnbc.org. · Generated 2026-09-02 22:41:55

The generated report: header with community counts, beginning balance, income and expense lines with all three columns, ending cash balance, and the person completing the report.

The PDF adds a few lines the on-screen table does not show: the **Beginning balance** on May 1, **Total Income + Beginning Balance**, a **Capital expenditure** line, and the **Ending cash balance**, all computed from the journal. The person completing the report is taken from **Settings** → **Fiscal years** → **Edit treasurer**, which is why Part 1 asks you to fill in your address and phone numbers there.

If any budget cell cannot be read as a dollar amount, the card shows a red alert and disables the download until you fix it.

Why this matters. The proposed budget you save here does double duty. When you run **Start new fiscal year** (section 6), each fund's budget in the new file is taken from this column, so the budget the LSA reported to the NSA and the budget the Monthly Report measures against are the same numbers with no retyping.

6. Start the new fiscal year

Run this from the **expiring year's file** once its books are finished (section 1). It creates the new year's file and carries your setup forward.

1. Open **Settings** → **Fiscal years** and click **Start new fiscal year**.
2. The **Start fiscal year ...** screen shows four cards:
 - **What carries forward:** funds, cash accounts, donors, Assembly and treasurer details, community counts. Each fund's budget in the new year is the **Budget (current FY)** figure you saved on the NSA Report page (section 5), falling back to its existing budget for any fund you left untouched. Transactions, receipts, reconciliations, and the audit cycle do not carry.
 - **Opening balances:** one field per cash account, pre-filled with each account's ending journal balance. If every month is closed and reconciled these are correct as shown. Adjust only if you know why.
 - **Outstanding items to carry:** every check and deposit still uncleared at the last reconciliation. These become the opening items in the new year's first reconciliation. Remove any that should not carry (for example a check voided after April 30).
 - **New data file location:** click **Pick a folder...** and choose or create the new year's folder, for example `Documents/Bahai/183 – 184 BE/`. The app refuses a folder that already holds a `stewardship.db`.
3. Click **Create and restart**.

Start a new fiscal year

2026-2027

This creates a new data file for 2026-2027 and carries your setup forward from 2025-2026. Your current file stays put as the archive. The app will restart to open the new file.

⚠ 16 periods in 2025-2026 still open

You can still start the new year, but consider closing the prior year's periods and finishing its year-end reconciliation first so the carried opening balances are final.

What carries forward

23 funds (with budgets), 3 cash accounts, 7 donors, assembly + treasurer, and community membership. No transactions, receipts, reconciliations, or audit history carry over.

Opening balances

Pre-filled from each account's balance at the end of 2025-2026. Adjust if needed.

Bank Checking

\$

14545.10

OCS Holding

\$

0.00

Petty Cash / Undeposited

\$

230.00

Outstanding items to carry (7)

Still-uncleared checks and deposits-in-transit, carried for your first reconciliation next year. Remove any that don't apply.

Outstanding check · Bank Checking · \$125.00

Outstanding check — caterer (prior FY)

Deposit in transit · Bank Checking · \$300.00

Deposit in transit (prior FY)

Deposit in transit · OCS Holding · \$1,425.00

OCS contributions · 9 donors

Deposit in transit · Petty Cash / Undeposited · \$80.00

Contribution — Gloria Whitfeather (cash)

Deposit in transit · Bank Checking · \$1,000.00

Contribution — Mei-Ling Chen

Outstanding check · Bank Checking · \$92.40

Feast refreshments + holy day program

Outstanding check · Bank Checking · \$850.00

Transmittal to National Bahá'í Fund

New data file location

We'll create stewardship.db in the folder you pick. Best practice: a new folder named for 2026-2027.

Stewardship v1.4.0

The New Fiscal Year screen: confirm opening balances and outstanding items, pick the folder, and go.

Stewardship · Treasurer's Manual

69 / 78

The app restarts on the new file, seeds it, and lands on the Dashboard. If any month of the old year is still open, a yellow warning appears first; you may proceed, but the proposed opening balances will not include anything posted later to those months.

Now turn to **Part 2** for the start-of-year checklist. The old year's file is untouched and one click away in **Settings** → **Data file** for the rest of the audit.

7. Archive the year

- Keep the year's folder exactly where it is. Never rename or move a `stewardship.db` the app knows about.
 - Keep the manual backup you made in section 1 with the year's paper records.
 - When the audit is complete and the NSA report filed, make one final backup of the old year's file. Nothing in it should change again.
 - Stewardship keeps a `stewardship-backups/` folder beside each data file with a dated snapshot for each day the file was opened in the last thirty days. That is your safety net for the working year; the manual backup is your archive.
-

Year-end checklist

Finish the books (early May)

- ☐ All transactions dated on or before April 30 posted
- ☐ Final OCS import into the expiring year's file
- ☐ April 30 reconciliation complete for every bank and savings account, variance \$0.00
- ☐ All nineteen months closed
- ☐ Manual backup made

Annual statements (May)

- ☐ Audit page fiscal year set to the closing year
- ☐ Statement of Activities downloaded; no wrong-side warnings
- ☐ Balance Sheet downloaded; cash – net assets = 0
- ☐ Budget vs. Actual downloaded from the Funds page
- ☐ Annual report presented to the LSA

Audit (May – June)

- ☐ Audit answers completed and saved
- ☐ Auditor package downloaded; all three check tiles green
- ☐ Document bundle (.zip) downloaded
- ☐ Bank statements, prior audit report, redacted minutes, invoices, and asset list gathered
- ☐ Audit cycle started with two auditors; bundle handed over; checklist ticked
- ☐ Findings recorded and resolved; cycle marked complete

NSA report (by July 31)

- ☐ NSA Report page: proposed Budget (current FY) entered for every fund and saved
- ☐ Report PDF downloaded, reviewed and approved by the incoming Assembly, and sent to the Office of the Treasurer

New year

- ☐ New fiscal year created from Settings → Fiscal years; Part 2 checklist completed
- ☐ Final backup of the closed year filed with the paper records

Reference

Quick answers for treasurers who already know the routine. Task-by-task instructions live in Parts 1 through 5.

Finding your way around

The sidebar is grouped by when you use each screen.

Group	Screen	What it is for
	Dashboard	Cash on hand, cash accounts, fund balances. Click any figure to see the transactions behind it.
Bookkeeping	Transactions	The cash journal. New transaction, Import OCS, Contributed expense. Search and filter by type or account.
	Receipts	Every receipt, with Issued / Void status. Open one to preview, download, or void.
Month-end	Monthly Reports	One Bahá'í month at a time: figures, PDF, close and reopen.
	Reconciliation	Bank reconciliations, most recent first.
Manage	Donors	Donor records, eMembership import, community roster.
	Funds & Budgets	Chart of accounts, budgets, Budget vs. Actual PDF.
Year-end	Audit	Auditor package, OAS document bundle, year-end statements, audit cycle.
	NSA Report	The annual NSA Treasurer's Financial Report, with next year's proposed budget per fund.
System	Settings	Profile, signature, community, fiscal years, cash accounts, data file, backups, updates.
	Activity Log	The immutable record of every change.

The sidebar footer shows the active data file's label and the app version.

Settings, card by card

Card	What you do there
Assembly profile	Name, locality code, state, treasurer name, mailing address. Shown on receipts and reports.
Treasurer signature	Upload a PNG or JPG under 256 KB; embedded on receipt PDFs.
Community	Adults, Youth, Pre-Youth, Children counts. Drive participation percentages and pre-fill the NSA report.
Fiscal years	The year in this file, its Open / Closed status, treasurer contact details for the NSA report, Start new fiscal year , and Recalculate periods (recomputes the nineteen month boundaries and re-routes transactions; only needed if the calendar data was ever wrong).
Cash accounts	Add, archive, restore accounts. Edit opening balance and date. Manage prior-year Opening items .
Data file	The active file's path, every other known file with Switch to this , Forget to drop a stale entry, and Add another data file... to open a file the app has not seen before.
Data maintenance	One-off fixups for files created before a feature existed. Safe to run twice.
Backup & restore	Auto-backup status, Back up database , Restore from backup .
Updates	Current version, Check for updates , Install & Restart .

The nineteen months

#	Month	Meaning		#	Month	Meaning
1	Jamál	Beauty		11	Qudrat	Power
2	'Azamat	Grandeur		12	Qawl	Speech
3	Núr	Light		13	Masá'il	Questions
4	Raḥmat	Mercy		14	Sharaf	Honour
5	Kalimát	Words		15	Sulṭán	Sovereignty
6	Kamál	Perfection		16	Mulk	Dominion

#	Month	Meaning		#	Month	Meaning
7	Asmá'	Names		17	'Alá'	Loftiness
8	'Izzat	Might		18	Bahá	Splendour
9	Mashíyyat	Will		19	Jalál	Glory
10	'Ilm	Knowledge				

Period 1 begins May 1. Period 17 includes the Ayyám-i-Há intercalary days followed by the month of 'Alá'. Periods 18 and 19 fall in the next Bahá'í year; period 19 is stretched to end on April 30 so the fiscal year has no gap.

The default chart of accounts

Code	Fund	Category
LOCAL	Local Fund	Income
CENTER	Center Fund	Income
EARMARKED	Earmarked Contributions (restricted)	Income
OTHER_INCOME	Other Income	Income
CONTRIB_EXPENSES	Contributed Expenses	Income
IBF	Bahá'í International Fund	Transmittal
WCEF	World Center Endowment Fund	Transmittal
CBF	Continental Bahá'í Fund	Transmittal
NBF	National Bahá'í Fund	Transmittal
SHRINE	Shrine of 'Abdu'l-Bahá Fund	Transmittal
INT_TEMPLES	International Temples Fund	Transmittal
RBC	Regional Bahá'í Council	Transmittal
DEV_FUND	Bahá'í Development Fund	Transmittal
CHAIR_PEACE	Bahá'í Chair for World Peace	Transmittal
TEACHING	Teaching / Proclamation	Local expense
FEAST	Feast / Holy Days	Local expense

Code	Fund	Category
CHILDREN_YOUTH	Children / Youth Programs	Local expense
EDUCATION	Education / Institute Training / Deepening	Local expense
SCHOLARSHIPS	Scholarships / Deputization	Local expense
PROPERTY	Property Expenses	Local expense
CENTER_OPS	Bahá'í Center Operations	Local expense
OTHER_EXP	Other Expenses	Local expense
ADMIN	Administrative Expenses	Administrative

Funds with transactions cannot be deleted, only archived.

Cash account types

Type	Use
bank	Checking account
savings	Savings or money-market account
ocs_holding	The NSA online-contribution holding account
petty	Petty cash or undeposited funds
other	Anything else
in_kind_clearing	Hidden; created automatically for in-kind gifts. Never appears in totals or forms.

Balances are never stored. Every balance you see is the opening balance plus the sum of non-voided transactions, computed live.

Variance conventions

Two conventions appear in the app. Red means “look at this” in both.

Report	Formula	Positive means	Colour
Monthly Report (screen and PDF)	Income: actual – target. Expense: budget – actual.	Favourable	Green if positive, red if negative
Statement of Activities, Budget vs. Actual	actual – budget for every fund	More than budgeted	Green for income above target; red for expense above budget

Backups and restore

Automatic. Each time the app opens a data file it writes `stewardship-YYYY-MM-DD.db` into a `stewardship-backups/` folder beside the file. One snapshot per day is kept; snapshots older than thirty days are removed. The folder is ordinary; you can copy from it in Finder or Explorer.

Manual. Settings → **Backup & restore** → **Back up database** writes a clean, portable single-file copy wherever you choose. Do this before starting a new fiscal year, before restoring, and after any big batch of entries.

Restore. Settings → **Backup & restore** → **Restore from backup**, confirm the warning, choose the `.db` file, then **quit and reopen the app**. Restoring replaces everything in the active file. To look at a prior year without replacing anything, open that year's file from **Settings** → **Data file** instead.

Updates

Stewardship checks for a new version each time it launches. If one exists, a banner appears in the bottom-right corner with **Later** and **Install & Restart**. Installing downloads the signed build, verifies it, installs, and relaunches. Nothing is ever applied silently. You can also check from **Settings** → **Updates** → **Check for updates**.

Troubleshooting

Data looks missing: donors, transactions, receipts. The wrong year's file is open. Look at the sidebar footer, or **Settings** → **Data file**, and **Switch to this** on the right year. Nothing has been lost.

The app opened to the Data Location page instead of the Dashboard. No active file is configured, usually after a reinstall or because the file was moved. Click the right entry under **Recently used**, or **Open existing file...** and find your `stewardship.db`.

A transaction shows Locked and I cannot edit it. Its Bahá'í month is closed. **Monthly Reports** → that month → **Reopen** → edit → close again.

The reconciliation variance will not reach zero. Work the six-step list in Part 4, section 1. Nearly always a fee, interest, a mistyped ending balance, or a forgotten deposit.

The Balance Sheet shows cash and net assets differ. An opening balance was changed without matching fund activity, or a transaction was edited in a way that broke a split. Open the Dashboard, click the fund figures to drill down, and compare against the cash accounts. The Activity Log shows what changed and when.

The auditor package button is disabled. The April 30 reconciliation for the primary bank account is not marked complete. Finish it.

The NSA Report Download PDF button is disabled. A cell in the Budget (current FY) column is not a valid dollar amount. The red alert above the table says so; fix the cell.

After a restore, the data still looks old. Quit the app fully and reopen it.

The OCS import says every row is Already posted. That is correct. You imported an overlapping download and nothing new was in it.

A receipt was issued to the wrong donor. Void the receipt on the Receipts page, then void and re-enter the transaction with the correct donor.

Glossary

Allocation. The split of a transaction across funds. Must sum exactly to the transaction amount. Transfers have none.

Audit cycle. Stewardship's record of one year's audit: the two auditors, the document checklist, findings, and completion.

Auditor package. The PDF that answers the numeric questions of the NSA Online Audit System from the reconciled books, each figure labeled with its OAS question number.

Cash account. A real place money sits. Balances are computed, never stored.

Deposit in transit. Money deposited before a statement date that the bank had not yet posted.

Earmarked. An allocation restricted by the donor to a stated purpose, recorded with a purpose note.

eMembership. The NSA membership system. Its CSV export populates donors and the roster.

Fiscal year. May 1 to April 30, divided into nineteen periods. One data file each.

Fund. A label for what money is for. Four categories: contribution, transmittal, local expense, administrative.

In-kind contribution. A gift of goods or services rather than cash. Recorded as matched income and expense with no cash effect, and receipted.

OAS. The NSA's Online Audit System, which organizes evidence into document categories D1–D13.

OCS. The NSA's Online Contribution System. Its Daily Activities report is imported; its contributions are never re-receipted.

Opening item. An outstanding check or deposit in transit from before this year's opening balance, carried in so it can be cleared in reconciliation.

Outstanding check. A check written but not yet cleared by the bank.

Period. One Bahá'í month within the fiscal year. Closed after it is reconciled and reported.

Reconciliation. Matching the journal to a bank statement until the adjusted bank balance equals the journal balance.

Restricted fund. A fund whose contributions must be earmarked. *Earmarked Contributions* is the only one in the default chart.

Transmittal. Money sent up to the National, Continental, or International funds, recorded as a withdrawal to a transmittal fund.

Variance. Actual against budget. See *Variance conventions* above for the sign rules.

Void. Retire a transaction or receipt without deleting it. Voided items stay visible, are excluded from totals, and can be un-voided.
